Important mainly because of the people in the conversation.

Hi Elliott,

Sorry for the delay in my response. We have been travelling quite a bit, but I did not forget about responding- now that I am back.

Good for you! I am happy that all the hard work is paying off.

You know that you can always use us as a reference! Chris has greatly benefited from RP4K! he is at UW and WLU in a double degree 5 yr Co-op. He is in his second year now and will be in a work term starting January with a Richmond Hill start up development company. This new program is structured, comprehensive, (difficult?), but in the end he will have a Waterloo Comp Sci. Honours and W.Laurier BBA . He is coasting through, it is not a ride in the park, but his programming basics have given him an amazing start in both his co-op terms. You should be proud of all the wonderful work your efforts are producing!

Again,
Feel free to pass on my email to any parent questioning the value of RP4K!

Cheers,
Edit
